DEAR CUSTOMERS,

People's desire for harmony and well-being can be met by soothing body care products. Natural ingredients support our skin's health and preserve a youthful appearance.

Harmful environmental influences stress the skin every day and holistic body care is therefore an important countermeasure.

The fantastic healing, protective and renewing power nature offers us was already well known to our ancestors. We have been using this knowledge for many years to give Aroma Derm the special quality that our customers really appreciate about us. Aroma Derm natural cosmetic products are made exclusively using organically grown or wild plant-based raw materials and top quality cold-pressed vegetable oils.

Our products are particularly rich in active ingredients and gentle on the skin at the same time. Ingredients specially tailored to different skin types offer the individually appropriate treatment for everyone.

Aroma Derm care products support the skin's natural acid mantle, give it elasticity and smoothness, and prevent the skin's natural ageing process.

The Aroma Derm range for the body includes products for anti-cellulite treatment, massages and body care.

Best wishes for much success in the future

ANTI CELLULITE TREATMENT

One simple and efficient method is the gel treatment that can be used specifically for cellulite. The secret to its effectiveness lies in the highly concentrated ingredients in the gel. No special premises or other basic requirements are needed for this treatment method. It is easy and space-saving to use, and is therefore also suitable for salons that don't have a shower or washing machine available.

When shouldn't you have an anti-cellulite treatment?

- Shortly after operations
- During pregnancy and while breastfeeding
- With a fever
- With kidney disease
- With thrombosis and severe varicose veins
- With phlebitis
- With high blood pressure
- In case of sunburn

What slows down (decreases) the effect of the anti-cellulite treatment or metabolism?

- Medication (e.g. the contraceptive pill)
- Illnesses (e.g. diabetes, epilepsy, ...)
- If the customer doesn't drink enough water!

BODY WRAPPING PROCEDURE

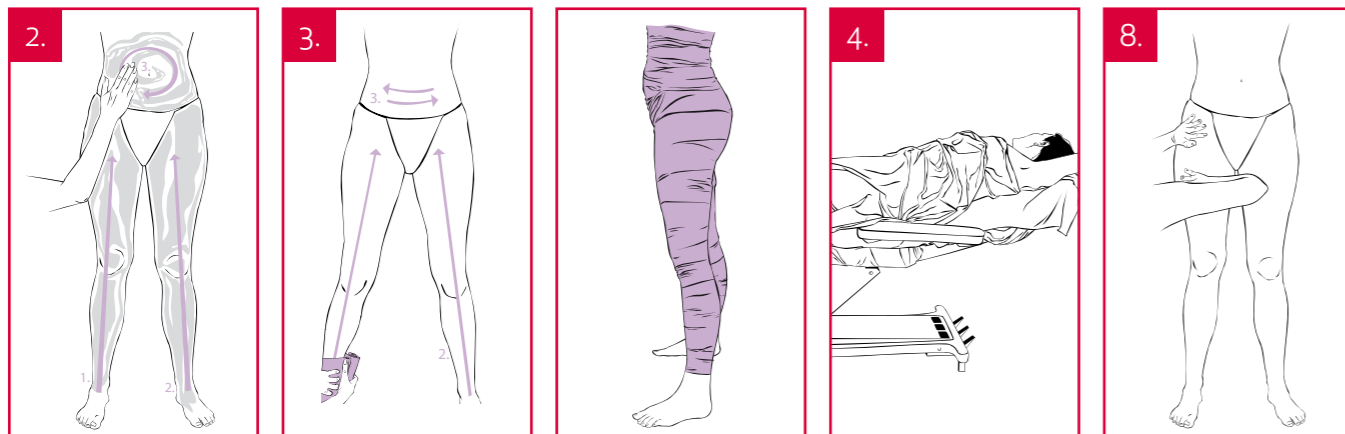

Note: Wear work gloves!

Item no.: 87004
Foil cutter

- Cover visible veins and spider veins with the **Cool Gel**.
- Apply the **Cello Gel** evenly from the bottom up. Start with the customer's right leg, then the left leg, stomach and finally the buttocks.
- Wrap the **foil** tightly from the customer's right ankle from the bottom up! And from the inside out! Then the customer's left leg – the stomach and buttocks can be wrapped and lifted a little tighter. Make sure, however, that the film is not too tight and digging in.
- Help your customer onto the couch and make them comfortable. Leave it on for 30 minutes with a **heated blanket**.
- If you leave the room during the treatment, please enquire whether the customer **feels comfortable** after 5 minutes at the latest!

- After the treatment time, carefully remove the foil using the **foil cutter**.
Tip: Lift the film slightly where it is wrapped tightly.
- If the skin is still wet, dab the customer gently with a towel or tissue. Do not rub!
- Apply the CELLO CREAM** aloe vera. Use sparingly. Possibly cream the back as well, as a service.
- Let the customer get up slowly and offer them a **glass of water!** (make sure they are not dizzy)
- Show the customer the visible improvements and discuss further **care for at home!** (see page 12)

THE PROCEDURE

Preparations:

Soak the bandages (3 x 20 cm) in lukewarm water and wring them out well. They must not be too wet!

Treatment essence recipe:

- 50 ml water
- 50 ml wrap lotion

Now soak the bandages with this lotion

Note: Wear work gloves!

1. Pretreatment: Cover the visible veins and spider veins with the Cool Gel. Apply the appropriate aromatic oil evenly to the legs, the stomach and the buttocks from the bottom up and massage in gently.

2. Treatment: Bandaging order: right leg (1st bandage), stomach and buttocks (2nd bandage), left leg (3rd bandage)

3. During the resting phase, the customer is wrapped in the prepared plastic film and covered with a blanket. Instead of the resting phase, an exercise phase is also possible during which the customer slips on a pair of suitable plastic trousers, and can then assist the effect on the treadmill, stepper or exercise bike. Leave on for 45 minutes in both cases.

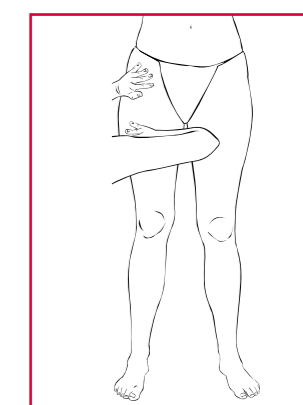

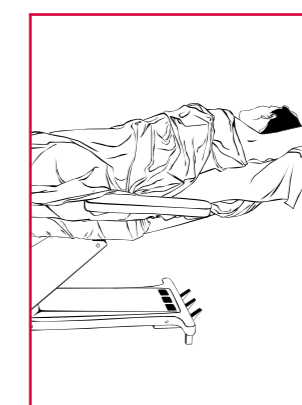

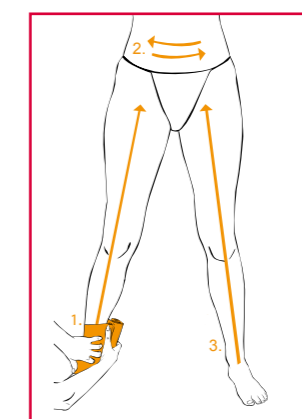

4. If you leave the room, please enquire whether the customer feels comfortable after 5 minutes at the latest!

5. After removing the bandages, the customer is dried off lightly and the aftercare is applied.

6. After the treatment, discuss the visible improvement in front of the mirror.

7. Help the customer into the bathrobe give them a glass of water.

8. Then finally provide additional advice for **body care at home.** (see page 12)

ACCESSOIRES BODY CARE

Heated blankets to optimise body treatments

Body wrapping is an effective and easy treatment. If the effect is to be even more intensive, professional application with a heated blanket is recommended.

This heated blanket produces the temperature of a slight fever on the skin. Therefore, the pores are opened up more and the essential oils can be absorbed deeper and better.

This enhances the effect, making it even more visible. It also shortens the treatment time to 1/2 hour.

Thalaslilm Heated Blanket

87100 **Thalaslilm Heated Blanket** 154x170 cm 1 pcs

The two-zone special blanket for Aroma Derm Thalasso therapy (or anti-cellulite treatments). The customer can be completely wrapped up with this blanket. Furthermore, it can also be used as a base during the massage or facial treatment.
